

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. NINTH BIENNIAL REPORT
OF THE
Board of Prison Commissioners
1911-1912

To His Excellency, Ben W. Hooper, Governor, and the Fifty-eighth General Assembly of Tennessee:

Complying with the statutes. The Board of Prison Commissioners, which were appointed under, and in pursuance of the act of the Legislature of 1897, for the management of the State Penitentiary, respectfully submit the following report of the operations of that department of the State for the biennial period beginning December 1, 1910, and ending December 1, 1912.

ORGANIZATION.

At the beginning of the ninth biennial period, the Board of Prison Commissioners were composed of the following members, to-wit:

HON. M. M. MARSHALL, *Chairman,*
HON. H. B. MORROW, *Secretary,*
HON. T. S. WILCOX, *Commissioner.*

On the 24th day of May, 1911, the said M. M. Marshall, having died, E. W. Essary was appointed to fill the unexpired term when the Board was re-organized by electing H. B. Morrow, Chairman, and E. W. Essary, Secretary.

On July 7th, 1911, the said H. B. Morrow's term having expired, J. S. Beasley was appointed as his successor, when the

Board was reorganized, J. S. Beasley being selected as Chairman; T. S. Wilcox, Secretary; and in accordance with section 2 of said act. J. S. Beasley was assigned to manage the main prison, T. S. Wilcox was assigned to superintend and manage the State Farm, and E. W. Essary was assigned to specially superintend and supervise the State's mining operations at Brushy Mountain.

On April 1, 1912, Commissioner Wilcox having resigned, James May was appointed as his successor; was elected Secretary, and assumed the assignment required in the superintendency and management of the State Farm, theretofore discharged by his predecessor.

PRESENT BOARD.

The present Board and assignments are as follows:

HON. J. S. BEASLEY, *Chairman*, Main Prison.

HON. JAMES MAY, *Secretary*, State Farm,

HON. E. W. ESSARY, *Commissioner*, State Mines.

The table of the Warden herewith published, shows as follows:

FINANCIAL OPERATIONS OF ALL THE DEPARTMENTS OF THE TENNESSEE STATE PRISON.

The present Board has only had charge of the Main Prison and the State Mines since July 7th, 1911, and the State Farm since April 1st, 1912. The result of the financial operations of all the departments during that time has been highly gratifying to the management.

We submit below for your consideration, the business operations of the prison departments for the years comprising the 8th and 9th biennial periods, showing the amounts paid into the Treasury, and the amounts of the vouchers issued, and balance remaining in Treasury.

From December 19, 1908, to December 19, 1909.

| MONTH | Payments To Treasury | Vouchers Issued at Nashville | Vouchers Issued at Brushy Mtn. | Total |

FINANCIAL OPERATIONS.

The year 1912—the only year in which the present Board has had entire charge of all the departments, shows a net profit to the state of \$185,300.29, which is greatly in excess of either of the other years.

You will note that in the year 1911, 6 1-3 months of which the prison was operated under the former management, and 5 2-3 months under the present management, that a less profit was shown than during either of the other years; but for your information we submit below a table showing the amount paid into the treasury, and the amount of vouchers issued, and the net balance during the year 1911.

FROM DECEMBER 19, 1910, TO JUNE 30, 1911.

UNDER FORMER BOARD.

| October..... | 32,745 40 | October..... | 33,817 54 |
| November..... | 33,493 39 | November..... | 37,658 79 |
| December..... | 64,172 33 | December..... | 32,008 36 |
| Total..... | \$ 305,108 54 | Total..... | \$ 203,937 19 |
| \$184,787 75..... | | \$205,138 58..... | |
| \$305,108 54..... | | \$20,550 83 Deficit. | |
| | | \$101,171 35 Surplus | |

You will note from the above that during the first 6 1-3 months of the year 1911, under the former administration, that there was a deficit of \$20,350.83, and during the last 5 2-3 months of the year 1911, under the management of the present Board, there was left a balance in the treasury of \$101,171.35.

While we have only had charge for 17 2-3 months, we have left a balance in the treasury during that time of \$286,471.64.

although we have been operating under the same contracts at the Main Prison entered into by the former Board in July, 1909, for a term of six years, and have been operating only one mine, whereas the former administration operated three. In this connection, it is a fact of great importance that every pound of coal taken out of the mines now, comes from a greater distance in the mines; requires a longer haul and a bigger expense than the most expensive pound taken out by the former administration.

This showing was made by cutting down the pay-rolls at both prisons, abolishing useless and expensive offices, reducing salaries, and by practicing every possible economy consistent with the proper maintenance of the institution.

We have not only considered the larger things, but the smaller ones as well. No official or employes have been allowed by the present Board to get anything whatever from the State but the salary allowed him by law. No official or employe is permitted to show any courtesies to any friend at the expense of the state. If any one desires to carry a friend to the Guard's Dining-Room for a meal, or through the prison to see the interesting points, he is required to purchase a meal or entrance ticket at the price of 25 cents and 10 cents respectively.

From a comparison of the figures below, showing the earnings from the dining room and gate receipts for the years 1909-10-11-12, will show the result of a rigid enforcement of this rule.

GATE RECEIPTS.

| | |
|--|-------------|
| For the year 1909 the receipts were..... | \$ 1,690 40 |
| For the year 1910 the receipts were..... | 1,540 20 |
| From December 19th, 1910 to June 30th, 1911..... | 551 50 |
| From July 1st, 1911 to December 19th, 1911..... | 1,234 00 |
| Total for year 1911..... | 1,785 50 |
| From January 1st, 1912 to December 19th, 1912..... | 2,239 10 |

You will note from the above that under the present administration the gate receipts has averaged about \$204.30 per month, while under the former administration the average per month during these years was only \$122.00.

GUARDS DINING ROOM.

| YEAR | Earnings | Expenses | Profit | Loss |
|-----------|-------------|-------------|-----------|-----------|
| 1909..... | \$ 9,215 79 | \$ 9,046 50 | \$ 169 29 | |
| 1910..... | 9,452 18 | 9,680 82 | | \$ 228 64 |
| 1911..... | 10,722 36 | 9,871 52 | 850 84 | |
| 1912..... | 12,758 73 | 11,321 15 | 1,437 58 | |

PERMANENT IMPROVEMENTS.

We have made many permanent improvements; we have purchased three new boilers for the power house at a cost of \$7,500.00; fittings, connections, etc., at a cost of \$5,000.00; heaters for boilers \$1,000.00; laundry building at a cost of \$4,000.00; equipment for laundry dryer, \$1,296.00; wringer, \$500.00; a new up-to-date blacksmith shop for \$700.00; a modern up-to-date crib, \$325.00; besides many repairs.

REFORMS MADE BY PRESENT BOARD.

While we are very much pleased with the financial showing of the prison during our management, we are much more gratified at the reforms which we have inaugurated. We have endeavored in every way to better prison conditions, and we flatter ourselves that we have been successful to a certain extent. We have endeavored to impress upon each and every inmate that the prison officials are much interested in his general condition and welfare; that while they have fallen, they are still human beings, and that with the proper effort on their part, that they can live down the crime committed, reform, and make law-abiding and useful citizens.

Our discipline is strict, but mild and humane. We do not allow any official or guard to curse, abuse or mistreat an inmate in any way. We urge them to do right, obey the prison rules, improve themselves morally and intellectually. Corporal punishment has decreased more than 33 1-3 per cent, and the discipline is extra good.

PAROLE FOR BOYS UNDER 16 YEARS OF AGE.

When the present Board took charge, we found several boys, ranging from ten to fifteen years of age, who were incarcerated

on account of being convicted of some petty offense. We were of the opinion that the prison was no place for children, and therefore took the matter up with the Governor, recommending that they be paroled under Chapter 537 of the Act of the Legislature of 1903, with the result that each was paroled, placed in a good home, and not one has gone wrong.

PRISON SCHOOLS.

For the betterment of the young convicts who are illiterate on account of an abuse of, or no opportunity to attend school before their incarceration, we have through our efficient Chaplain, organized a night school, with an attendance at present of more than three hundred.

No more interest or enthusiasm has ever been shown in school work than is being manifested by those poor unfortunates. The Chaplain is the Superintendent, and he has under him a corps of convict teachers, who are more fortunate than the pupils, in that they have a fair education, and who are glad to assist their fellow convicts in securing the rudiments of a common school education.

Some of these young men have said, and they feel, that while the State is receiving their labor, that they are getting value received by obtaining the fundamentals of an education.

In whatever is done for the prisoner, it must never be forgotten that he must be fitted to re-enter the every-day life of the community, and we believe that education in its broadest sense is the best means of strengthening the man for that difficult step. Its effect is to quicken the intellect, give new ideas, supply food for thought, inspire self-respect, excite honorable ambition, and thus afford a healthful substitute for low and vicious amusements.

PRISON LIBRARY.

No one should appreciate or need good books more than a prisoner. He is locked in his cell early at night, and although he has an electric light in his cell till nine o'clock p. m., he must remain there locked up, with no one with whom to converse,

and nothing to engage his attention. If given good books, he will have good company, forget his conditions, and improve himself.

We are glad to announce that the inmates of this institution now have access to the Prison Library, which is composed of 5,000 volumes of the most choice selections, treating on every subject. The books for this library have been donated to and set apart for the inmates of this prison by the big-hearted, charitable and Christian people of Tennessee and other states, the biggest donor being J. Pierpont Morgan, who gave his personal check for \$1,000.00 to be invested in good books for these unfortunates. This \$1,000.00 was invested in books by a committee who spent much time in the selection of choice volumes.

There is no excuse now for any inmate idling away his time at night, and we can assure you that nearly every one is taking advantage of this opportunity.

ABOLISHING THE STRIPES.

Of all the unpleasant things connected with prison life, having to wear the stripes is the most abominable.

We have seen prisoners on entering the prison, convicted technically of some petty offense, break down and shed tears upon having to don the stripes. What seemed to worry them most was the fact that, it did not matter how obedient they were to the prison rules, nor how exemplary in their conduct toward the prison officials, they were required to wear the stripes as long as they were incarcerated. Now, under the new rule abolishing the stripes, which was adopted by the present Board, an inmate upon entering the prison, is required to wear the stripes for only ninety days, provided, however, he makes a good prisoner, and violates none of the prison rules. Otherwise he is required to wear the stripes until his conduct becomes good, and he violates none of the prison rules for ninety days.

This alone has done more good to reduce corporal punishment and to maintain good discipline than all the other rules combined. It is the greatest incentive to cause the prisoners to do right that has ever before been offered.

When they have once reached that exalted standing, the First Grade, which entitles them to lay aside the stripes and don the new uniform, that is considered by every prisoner as the happiest period in his prison life, and no prisoner, unless he be a degenerate, will do anything which will cause him to lose his standing and thereby lose the privilege of wearing the uniform.

To illustrate the importance which they attach to the uniform, and to show their hatred for the stripes, we will state that, we have many times had before us First-Grade prisoners for violating some prison rule, when they would plead with us to inflict corporal punishment instead of depriving them of the privilege of wearing their uniform.

We have now more than twelve hundred inmates, and more than eight hundred of them are in the First Grade, and dressed in a new prison uniform, and many of those in the other grades are not there by choice, but are those who have not been in prison a sufficient time to advance their standing.

HEALTH OF THE PRISON.

A great number of the prisoners upon their reception at the State Prison are almost invalids. A great deal of this is caused from their being allowed to remain in unsanitary jails in the various counties of the state.

In a great many counties we understand, a man's physical condition has a great deal to do with his sentence, or place of punishment. If his crime does not merit a punishment of more than one year, if he is an able-bodied man he receives eleven months and twenty-nine days' jail sentence, and is worked on the public roads of this country; but if he is partially or wholly unable to work, he is sent to the state penitentiary to be cared for. Considering the class of prisoners received, the prison population has been unusually healthy during this biennial period, there being only one case of typhoid fever during the time. The physician's report shows that the predominant diseases are venereal diseases and tuberculosis. He states that in his opinion at least, one-third of the prison population have tuberculosis

in some form; this is appalling and should receive immediate attention of those from whom relief can be had.

The present management, immediately upon taking charge, saw the great necessity of taking some steps to relieve this situation, and after gathering all the information possible, decided that the only thing that could be done was to build a tuberculosis prison hospital, so as to be able to isolate and separate those who were suffering with the disease from those who were not thus infected.

Upon examination of the laws as to the authority of the Board to build a tuberculosis hospital, we decided that we had no such authority, but to be sure, we submitted the question to the Attorney General for the State, and in a written report to the Board, he stated that the Board had no authority, but that authority to do so would have to be conferred on the Board by a special act, authorizing a special appropriation.

This, therefore, is a question that addresses itself first to the Legislature, and we regard it as the most important question to be considered by the members of the present General Assembly.

The State of Tennessee is not in the penitentiary business alone for financial gains; but it is a public necessity, and was established for the purpose of taking care of, and caring for her unfortunate criminals.

For the year 1912 there has been turned into the Treasury of the State a balance of \$185,300.29, that is, the State has made that as a net profit, or the proceeds of the labor of her criminals, and while we believe in an economic administration of the State Prison, we do not believe in putting the dollar above the lives and health of these unfortunates.

While the law has assigned them to our care and keeping, we feel the weight of our responsibility, and feel it our duty to protect their lives and health during the time they are incarcerated.

The state owns an ideal site upon which to construct a tuberculosis hospital, just south of the south prison wall, and the only cost to the state will be the expenses of the building proper,

Left Wing of New Prison.

its furnishings, the extension of the east and west wall, the moving of the south wall, so as to include the hospital within the walls of the prison as extended.

CONVICT FUND.

This is a fund from six to seven thousand dollars, which belongs to the various convicts.

They have accumulated this amount by working after they had made their task, for which extra service they are paid.

This fund has been imposed upon in the past, but the present Board regards this as a sacred fund, and are closely guarding it to see that no one procures any part of it, unless it be the convict who is entitled to it.

This fund is now deposited in the name of the Board of Prison Commissioners, in two good and solvent banks, with good personal bonds from each, and is subject to check only for the benefit of the convict who is entitled to it, said check to be signed by the Chairman of the Board of Prison Commissioners.

It has been the custom to pay out to any one who could procure an order from the convict for a certain amount.

You have no idea how the convicts have been imposed upon in this. Various parties, and those who claim to be attorneys, would persuade the prisoner to give them an order for \$25.00, \$50.00 or \$100.00, telling them that they would get them pardoned. In this way they would procure their orders, receive the cash and get no pardons

All this has been cut out by the present Board. We pay no such orders, except those given for the benefit of the convict, or his near relatives, who are in destitute circumstances.

RESTORATION TO CITIZENSHIP.

A person who is convicted of certain felonies is disfranchised by the statutes in this state.

The practice is not uniform throughout the United States, many states having similar laws, while in other states a person

is not disfranchised for crime. Notable among such states is Massachusetts.

We are not convinced that any great benefit is derived by disfranchisement for crime, but if it is to be continued in this state, there should be some different way for restoration to citizenship than by having to resort to the courts. There are many men who have served a term in prison who are now leading honorable lives, who are afraid to apply for restoration to citizenship, because it again brings to public notice their imprisonment and the crime which they are trying to live down.

There should be some automatic way by which a man who has made a good prisoner, and who has lived an honorable life after release from the State Prison for a certain period could regain his civil rights, free from caprice and publicity.

ADVISORY BOARD OF PARDONS.

The Board of Prison Commissioners also constitutes the Board of Pardons.

During this biennial period, the Governor has referred many cases to the Board for report and recommendation.

This is the most arduous work connected with the duties of the Commissioners, the most of which is done by its Chairman on account of the fact that he is located at the Main Prison where all the applications are on file.

In investigating an application for pardon, it is absolutely necessary to read and digest the transcript of the evidence; and all the affidavits and other written matter on file, and in most of the cases we find this very voluminous.

We usually make our recommendations upon the new matter filed after conviction, and if the Supreme Court acts, after the action of the Supreme Court. The Board of Pardon is not a court of review; hence the Board will rarely ever make a favorable recommendation for the petitioner unless some material matter is filed, in addition to the record of evidence in the case, which must be of sufficient importance and weight to justify a favorable recommendation.

It is useless for any prisoner to ask clemency unless his prison record is good, as it is a rule, adopted by the Board never to recommend clemency unless the prisoner's conduct record is clear, and his standing places him in the first grade.

The Board of Pardons meets at the Main Prison on Tuesday after the first Monday in each month, for the purpose of hearing oral statements or arguments in favor of, or against the application for clemency.

It does not matter what action taken by the Board with reference to an application, whether favorable or unfavorable, a written report and recommendation must be made to the Governor; which shall include a summary of all the facts relied on for executive clemency, and the grounds upon which the Board bases its recommendation.

INSANE CONVICTS.

We have now five convicts incarcerated in the prison at Nashville, who are violently insane, and have become so since their incarceration. The prison is no place for such unfortunate beings, as no court would send them here provided a plea of insanity was interposed and sustained, and they should not remain here if they become so after their incarceration.

The prison is supposed to be a place for the punishment of crime and of reformation. You can neither reform nor punish an insane person. We are not prepared for them here, and are of the opinion that there should be some needed legislation along this line to relieve the situation.

INDETERMINATE SENTENCE AND PAROLE LAWS.

Every argument is in favor of the enactment of these laws, and not a single reason against it. Many of the states have enacted these laws, and after trying them, no one has ever dreamed of repealing them.

The modern idea of prison life, is to reform rather than punish. You cannot reform a man unless you hold out to him some hope and encouragement. The indeterminate sentence gives hope

to the man who is incarcerated, and the parole law will encourage him and keep him from re-entering a life of crime after he is discharged from prison.

Both laws will do much in promoting and preserving good prison discipline.

BRICK YARD.

The brick yard plant has not been operated during this biennial period. The last biennial report shows a considerable loss, and we understand that the Legislating Committee of 1910 recommended that further operation of the brick yard be discontinued.

While the plant a few years ago cost the state \$20,000, it is at present almost worthless, and while there were many thousand brick on hand at the beginning of this biennial period, they are soft and inferior in quality, and cannot be sold for anything like a fair price.

Then again, prison made brick is a hard sale, on account of the fact that, no contractor who works union labor will purchase them at all, as their labor will not use them.

We recommend an absolute sale of the brick plant.

STATE FARM.

On April 1st, 1912, the present Board, through Commissioner, James May, assumed the management and control of the state farm, at which time little or no preparation had been made for the planting and cultivation of a crop, but considering the time of year and the unfavorable surroundings, and especially lack of preparation, the Board is very much gratified at the good showing made.

For your consideration we submit below the net earnings of the farm for the years comprising the 8th and 9th biennial periods:

Net Earnings.

| | | |
|-----------|----|-----------|
| 1909..... | \$ | 2,219 94 |
| 1910..... | | 1,661 10 |
| 1911..... | | 4,466 29 |
| 1912..... | | 10,024 22 |

By comparison you will find that the farm has done exceedingly well for the year 1912 as compared with the other years. We have made many permanent improvements on the farm during this biennial period.

We found the farming implements run down and greatly out of repair; we have purchased new ones and are now well supplied.

We have disposed of many of the old worn-out horses and mules and replaced them with younger ones. The dairy, which is run in connection with the farm, has been greatly improved by disposing of the old tubercular and diseased cows and replacing them with fine young Jerseys. We now have 80 first-class cows, and intend to increase the number to 125 within the next few months. With this increase in number and improvement in efficiency, we expect to make the dairy one of the most profitable departments connected with the entire prison system.

We have everything prepared for a good crop for the coming year, having more than 250 acres turned for corn, besides all the vegetable lands well prepared. With anything like a favorable season, we contemplate making the year 1913 the banner year for the farm and dairy.

AUTHORITY TO SELL TIMBER.

The state own several thousand acres of timbered land at Brushy Mountain and on the Herbert Domain; also much valuable cedar on the state farm. Much of this timber is valuable and is deteriorating in value, and should be preserved and marketed. Under the present law the Board of Prison Commissioners have no authority to dispose of it.

For want of such authority the state has already sustained a great loss on account of natural decay, etc.

HERBERT DOMAIN.

For the information of the Governor and the members of the present General Assembly, we insert below a report in the form of a letter written by J. S. Beasley, Chairman of the Board of

Prison Commissioners, to Gov. Ben. W. Hooper, bearing date of November 13th, 1911, and which will give the facts relative to the Herbert Domain, as understood by him at that time. Said letter is as follows, to-wit:

*November 13th, 1911.

Gov. Ben W. Hooper, Nashville, Tenn.

DEAR SIR: Replying to your inquiry seeking information relative to the Herbert Domain, beg to say that I have recently visited this property, and to some extent made an investigation of it.

I am informed that at the time of the purchase of the property by the state it was considered, and was, the best farm on the Cumberland Plateau, consisting of between 500 and 800 acres of fertile mountain land, well watered, having located thereon two splendid residences, several tenant houses, a beautiful park, etc. It was known as the Herbert Cattle Farm, and had been occupied by Joseph J. Kittel, a New Yorker, for several years prior to his death, which occurred only a short time before the purchase of it by the state. Said Kittel spent a great deal of time and money on this property, and made it a beautiful country home and mountain farm.

Although the State has spent \$6,885.88 on it since its said purchase in an effort to keep up the improvements, having employed a superintendent, allowing him the rents of the entire property, and in addition a salary of \$1,000.00 per annum, as compensation for his services; nevertheless, I found the property in a deplorable state, the barn and the greater portion of the fencing burned and the remainder of the fencing allowed to become out of repair until at present there is not more than seventy-five acres under fence, and the once beautiful and fertile meadows and glades have become and are nothing more than abandoned sage fields.

The new Board of Prison Commissioners has not made any disposition of this property yet, as the same is now and has been for the last four years occupied by Thomas Vaughn, a young single man about twenty-two years of age, son of Andrew B. Vaughn, the superintendent, who claims to have a contract entered into with our predecessors, and which he claims will not expire until 1914; under this contract the superintendent gets the entire rents of the place and \$1,000 per annum in addition to his salary, and his son, Thomas Vaughn, lives thereon. We have decided to abolish the office of superintendent of the Herbert Domain and to create an office to be known and designated as the office of "Caretaker of the Herbert Domain." The duty of said officer is to look after and protect said property from fires, trespassers, etc., and to keep the houses, the fences and the improved lands in a fair state of repair. We have several applications filed with us by responsible parties, seeking appointment to the new position, each of whom proposes to take charge and to look after such duties, and the only compensation asked for their services is the rent of the fenced lands and houses. This new position

will be created and a proper party appointed thereto, who will take charge not later than January 1st, 1912.

By virtue of the authority conferred by an Act of the General Assembly of the State of Tennessee, being Chapter 378 of the Acts of 1903, the Board of Prison Commissioners, by and with the approval and consent of the Governor, on the 8th day of January, 1907, purchased this tract of land as additional coal lands for the state. This purchase was made from Mrs. Matilda G. Kittel only a few days before Governor John I. Cox was succeeded by Governor M. R. Patterson. Governor Cox was the prime mover in the purchase of this property, while it was understood at the time that Governor Patterson opposed its purchase, which fact is corroborated by subsequent legislation. Commissioner Hartford and Rogers voted in favor of the purchase, while Commissioner Marshall opposed and voted against the purchase. This tract of land was bought by the state upon the recommendation of N. L. Reynolds, who was at that time superintendent of the Brushy Mountain Coal Mines; the act under which said purchase was made provided that before purchasing coal lands the Board should select with great care a competent and skilled mining expert, who should examine, decide, approve and certify that the coal lands proposed to be purchased were suitable and profitable coal mining property.

The Herbert Domain is supposed to contain about 10,000 acres of land and is located on the Cumberland Plateau in the counties of White, Bledsoe, Cumberland and Van Buren. The consideration for the purchase was at the rate of \$12.00 per acre, \$50,000 of which was to be paid in cash and the balance payable on January 8th, of each year, in six installments, with interest, notes being executed for the deferred payments.

While this land was purchased for coal lands, it has been only partially prospected and while I do not know anything about coal or coal lands, the partial prospects and outcroppings indicate a good mining proposition. I had a conversation with R. A. Shiflett, the state's chief mine inspector under Governor Patterson, a short time ago, in which he told me that he made a report on said property to Governor Patterson at his request, that his report was unfavorable and that he did not think a great deal of the property as a profitable coal mining proposition.

On the same day this property was purchased the Nashville, Chattanooga and Saint Louis Railway Company agreed in writing with the State of Tennessee, that it would construct a line of railroad from its main line to and upon this property as soon as said Board of Prison Commissioners was authorized and directed by the General Assembly to establish a branch prison thereon, to open and operate coal mines, and to enter into an agreement that it would after twelve months from the time of completion of said road to the tippie ship on an average of not less than 500 tons of coal and coal products per day; and further, that the state donate through its land a right of way a hundred feet in width for said line and any extensions and branches. The railroad company also agreed to give the state what is known as the Whitwell rate for all coal transported from said mines, and that it would not

discriminate in any way in the distribution of cars and equipment against said state mines in favor of any other mines located upon said railway, etc.

By Chapter 430, Acts of 1907, the Board of Prison Commissioners was authorized*to develop said property, to build stockades and establish a branch prison thereon, and employ all convicts that may be necessary, provided the Commissioners, with the consent and approval of the Governor, should conclude that after full inspection and investigation, it would be to the best interest of the state to develop it, and to have the report of a competent and skilled expert as to the quality and quantity of coal; and also ratified said agreement with said railroad company.

By Chapter 507, Acts of 1907, the Board of Prison Commissioners, by and with the approval of the Governor, was authorized and empowered, in its discretion, to lease not exceeding 300 convicts for the exclusive purpose of building and constructing a standard gauge railroad to and upon the property known as the Herbert Domain, etc. No steps were taken by the Board of Prison Commissioners under the last two Acts above referred to, unless it be the investigation by R. A. Shiflett, the report of which was made to Governor Patterson, as aforesaid.

By Chapter 388, Acts of 1909, passed April 28th, 1909, the Board of Prison Commissioners was authorized to lease out and to enter into contracts for a term of six years for the employment of the convicts within the walls of the Main Prison.

By Senate Joint Resolution No. 48 passed April 29th, 1909, the Board of Prison Commissioners was directed and instructed to establish immediately a branch prison upon the Herbert Domain, to open and operate coal mines thereon, and to enter into agreement guaranteeing to the Nashville, Chattanooga and Saint Louis Railway, after twelve months from the time of the completion of said road to the tipple on said property, not less than 500 tons per day, etc.

Under and by virtue of the authority conferred, Chapter 388, Acts of 1909, the Board of Prison Commissioners, on the 24th day of June, 1909, entered into contracts with Gray & Dudley Hardware Company and others, whereby all convicts were leased to be worked within the walls of the main prison for a term of six years, with the exception of 800 prisoners for use at the State's mines at Brushy Mountain, and as many more as it found necessary to be used in the power house and other departments at the Main Prison. Under these lease contracts above referred to, it occurs to me that it will be impossible for the Board of Prison Commissioners to do anything toward the development of the Herbert Domain until said contracts shall have expired, which will be on the 30th of June, 1915, as all the convict labor, except the 800 reserved for use at Brushy Mountain Coal Mines and such other number as may be used at the power house and other departments of the Main Prison, are leased out under binding and valid contracts; unless, however, we should close down and cease to operate the State's mines at Brushy Mountain and use the convicts reserved for these mines to develop and operate mines at the Herbert Domain, which would be very unwise indeed.

This property ought to be thoroughly prospected (it should have been before it was purchased by the state) and an estimate made as to the quantity and a report as to the quality by an A-1 mining expert, and after a thorough investigation, if

New Laundry.

it should be determined that the property is not a first-class mining proposition, then and in that event the State should dispose of it, as it is an expense to the state to keep it, and this is the only purpose for which the state could use it; but, if on the other hand, a thorough prospecting and investigation should reveal a first-class coal mining proposition, then at the expiration of these lease contracts aforesaid, the convicts so leased, except the life men, should be taken and used in developing and mining and removing the coal from said Herbert Domain property.

Under the contract of purchase, the land was to be surveyed by the state, and the number of acres accurately ascertained. The notes given for deferred payments recite that if there is less than 10,000 acres, said cost price shall be reduced in accordance with the reduction in acres, and if there is more than 10,000 acres, said cost price shall be increased in accordance with the increase in acres. Since the purchase of said land the same has been surveyed by Jack Skidmore, and his survey shows more than 11,000 acres, and said increase in acreage is now being paid for by the state, and another purchase money note matures on or about January 8th, 1912. By Senate joint resolution No. 18, Acts of 1909, the Governor, the Treasurer, the Chairman of the Board of Prison Commissioners and the Comptroller are authorized and empowered to employ an expert civil engineer to make a survey of said lands and to make a map of same, platting out all interferences and older titles (as there is some question about the title of a portion of this land), and the Attorney General of the State is directed to render the civil engineer so employed such assistance as may be necessary in order to clearly set forth the condition of the title and any conflicting claims in order that the state may get the land that it pays for, and also that the Comptroller be directed to draw his warrant on the Treasurer, for a sum not to exceed \$1,000.00 to defray the expenses of said survey. If any action has been taken under this resolution, I am unable to find it of record in my office. I recommend that you call a meeting of the officials designated above for the purpose of taking some action with reference to this survey, as this matter should be settled before the maturity of the purchase money note, January 8th, 1912.

I do not know whether there was any legislation relative to the Herbert Domain enacted by the last Legislature, as I have not seen a copy of the Acts of same.

Very respectfully,

J. S. BEASLEY,
Chairman Board of Prison Commissioners

The present Board, for the reasons stated in the above report or letter, has not taken any action relative to the Herbert Domain, except to abolish the office of Superintendent and cut out the \$1,000 salary.

The property is now, and has been, occupied by A. B. Boynton since January 1st, 1912, whose duty it is to look after the property, protect it from fires, trespasses, etc., for which he receives the rents of such of the lands as he desires to cultivate.

GENERAL DESCRIPTION MAIN PRISON.

The main prison is a little city in itself, being an up-to-date manufacturing institution, comprising several industries, included with the business of the contractors, the different departments of the prison.

CONVICT KITCHEN AND DINING ROOM.

The convict kitchen and dining room are in charge of, and managed by the Steward, where food is prepared and served three times a day to more than twelve hundred prisoners.

The kitchen is equipped with steam cooking machinery, consisting of a coffee urn of 100-gallon capacity, three steam kettles of 75 gallons each for cooking beans, peas, soup, etc., meat cookers of 500-pound capacity at a time; vegetable cookers of 16-bushel capacity, two large bake ovens and a twelve-foot range for frying. About twenty convicts are employed in this department.

GUARDS' KITCHEN AND DINING ROOM.

The guards' kitchen and dining room is where food is prepared and served for the guards, prison officials, those who are employed by the lessees and desire to board with the state, and for the sick prisoners who are in the hospital.

This has no connection with the convict kitchen and dining room, but is some distance away, and is also in charge of a steward, who gives employment to about ten prisoners in this department.

THE STATE-SHOP.

The State-Shop or manufacturing department is where the prison supplies are manufactured, including shoes, underwear, etc., for the convicts, both at the Main Prison and at Brushy Mountain. This department is in charge of a foreman employed by that state, who gives regular employment to seventeen prisoners.

THE NEW LAUNDRY.

This enterprise is located in a new and up-to-date brick building, is modernly equipped, and is where all the convict clothing, table linen for the officials dining room, and linen for the Administration Building is washed and ironed. It is in charge of a foreman employed by the State, and gives regular employment to ten convicts.

THE POWER HOUSE.

This is the most important division of the entire system; the heart of the institution, and hence the most expensive, the fuel being the greatest expense, as more than \$27,000.00 is spent for this per annum.

All the motive power for all the industries of the prison and appurtenances is supplied from the power house, which is equipped with boilers, pumps, heaters, engines, fans, generators, transformers, converters, etc., water filters, purifiers and fire and pumps.

From the power house is supplied electric power for driving electric motors in the factories, laundry, pumps at the river, elevator in the Administration Building, electric current for lighting the prison, buildings, offices and grounds, and for charging the guard wire on the enclosing wall and in the air-chambers in the prison, the voltage being raised by convertors and transformers from 120 to 2,000 volts; steam cooking, heating, drying, hot-air for warming in the winter, cold air for cooling in the summer, compressed air for pumping water, hot water for the hosiery mill dye tubs and blasts for forcing the draft under boilers, and other machinery and equipment, including a pipe cutting and fitting shop.

This department is under the charge of a chief engineer and assistant and a machinist, and 37 convicts are regularly employed in this department.

COLD STORAGE AND ICE PLANT.

The cold storage warehouse is 46 feet wide and 106 feet long, divided into seven rooms, and contains about 4,240 square feet of floor space and about 59,360 cubic feet of storage space.

The piping through which the brine is circulated is regulated in the various rooms in order to meet their various requirements. One room is used for a beef room, and about 30 beeves or carcasses can be accommodated at one time. The temperature of this room can be reduced to 18 degs. Fahrenheit, but is maintained at about 60 degs. The other rooms are used for storing potatoes, cabbage, onions and various food products raised on the State farm, or that which is purchased at the market for feeding. The refrigerator plant and ice-making machinery are run in connection with the power house, and the brine is pumped from the tanks in which it is cooled, a distance of about 400 feet through a four-inch pipe to the cold storage department.

The ice-machinery and the entire equipment are modern in construction, and are operated by regular engineers who have charge of the power house.

In addition to supplying the cold-storage room, manufacturing ice for all the prisoners, officials, etc., we sell more than \$3,500.00 worth of ice annually.

THE FOUNDRY.

This enterprise is conducted by the Gray-Dudley Hardware Company, who under contract, have leased from the State the foundry buildings, for which they pay the state \$2,400.00 per annum, and 199 men, for which the State receives \$1.10 per day each, and who are engaged in the manufacturing of all kinds of stoves, ranges, stove castings and country hollow-ware.

HOSIERY MILLS.

This department is being operated by the Hartford Hosiery Mills Company, who have leased from the state a large three-story brick building, for which the state receives \$1,800.00 per annum, and 199 convicts under contract, for which the state

receives \$0.51 per day, and 13 convicts under special contract, for which the state receives \$0.51 per day each.

The hosiery mills produce ladies' and children's hose of all grades and kinds.

TENNESSEE SHOE COMPANY.

The Tennessee Shoe Company has leased from the State a large, three-story brick building, from which the State receives \$1,380.00 per annum, and 199 men, for which \$0.50 per day is received. It manufactures all kinds of shoes.

TENNESSEE HARNESS COMPANY.

The Tennessee Harness Company is engaged in finishing leather, and in the production of all kinds of harness, saddlery, bridles, etc. It has leased from the State a three-story brick building, and the third story of the cold storage building, for which the state receives \$1,500.00 per annum, and one hundred convicts, for which the state receives \$0.65 per day each.

PANTS FACTORY.

This building at present is being operated by the Old Hickory Manufacturing Company, who on the first day of June, 1911, assumed the contract, assumed by the Nashville Pants Manufacturing Company, on the 14th day of December, 1910, entered into between the Board of Prison Commissioners of the State of Tennessee and the Stearn Manufacturing Company, on the — day of —, 1909.

This enterprise has leased from the state a small building, for which the state receives \$600.00 per annum, and it has leased 40 convicts, with the privilege of 100 convicts, for which the state receives \$0.50 per day each.

Those who are engaged at the pants factory, are employed in cutting and making all kinds of pants.

The state not only furnishes the buildings and convicts' labor to the various contractors, but in addition it furnishes them with their water, power for running their machinery, etc.

BOARD OF PRISON COMMISSIONERS AND THE OWNERS OF THE FACTORIES LOCATED WITHIN THE PRISON WALLS.

The contracts entered into during the month of June, 1909, for a term of six years, between the former Board of Prison Commissioners and Contractors, and which are in effect at present, are as follows:

| | |
|-------------------------------------|------------------|
| Gray-Dudley Hardware Company..... | For 199 Convicts |
| Hartford Hosiery Mills Company..... | For 199 Convicts |
| Tennessee Shoe Company..... | For 199 Convicts |
| Tennessee Harness Company..... | For 100 Convicts |
| Pants Factory..... | For 40 Convicts |

On December 1st, 1912, there were 737 inmates employed in the factories above-named. The prisoners so employed are fed, clothed, disciplined and controlled by the prison authorities, the contractors paying a stipulated price per day for each for their labor, a day's work consisting of ten hours.

On December 1st, 1912, inmates were employed at the Main Prison on State account, as follows:

| | |
|--------------------------|----|
| State Shop..... | 17 |
| Prison Laundry..... | 10 |
| Convict Dining Room..... | 10 |
| Power House..... | 37 |
| State Farm..... | 35 |
| Guard's Dining Room..... | 10 |

In Miscellaneous employment on that day there were 235 men. In this number are included the inmates who were working at the pump station, wings, hospital attendants, the yard force, janitors, porters and office boys in the administration building, prison bookkeepers and a number of prisoners classed as "dead-heads," who are employed in beating rock and in the performance of light work of a miscellaneous character.

On account of an increase in the prison population, the number of men classed as "dead heads" and who are engaged in the unprofitable work of beating stone, has increased until there are entirely too many inmates engaged in miscellaneous work.

If the number of convicts is not decreased by some kind of legislation, we are of the opinion that it is absolutely necessary to add another prison industry within the prison walls, and as all the buildings are now occupied, it will be necessary to erect another building within the walls.

RECOMMENDATION.

That the present General Assembly enact the following laws:

1. Authorizing the Board of Prison Commissioners to build a modern tuberculosis prison hospital, and appropriating a sufficient amount of funds therefor.

2. An indeterminate sentence, fixing a maximum and a minimum, and a modern parole law.

3. An act creating the office of jail inspector; whose duty it shall be to inspect the county jails and county asylums in the various counties in the state; also all the state charitable institutions, including all the departments of the state prison.

4. That all persons convicted of a crime, whose punishment is three years or less, be kept in the county where convicted and worked on county road, and not sent to state penitentiary.

5. That the Board of Prison Commissioners be authorized to sell and dispose of all timber on the state's property, at Brushy Mountain, Herbert Domain and the state farm, that they consider decaying or deteriorating in value.

6. Substituting electrocuting for hanging.

7. A law by which persons who have lost their citizenship on account of conviction for crime, may have the same restored to them automatically, without having to resort to the publicity of the courts.

8. That suitable quarters be provided for the insane criminals and that they be placed there instead of in the State Prison, and provision made for transferring those who are already incarcerated, and those who may hereafter become insane after incarceration.

For further and more definite information, we refer you to the reports of the various officials at both the Main Prison and Brushy Mountain, and especially to the report of G. F. Clark, Chief Clerk at Main Prison, all of which are hereto attached and made a part hereof.

Respectfully submitted,

J. S. BEASLEY, *Chairman,*

JAMES MAY, *Secretary,*

E. W. ESSARY, *Commissioner of Mines.*

Prisoners Plowing and Hauling.

Report of Chief Clerk

NASHVILLE, TENN., December 19, 1912.

To the Hon. James S. Beasley, Chairman, James May and E. W. Essary, Board of Prison Commissioners, Nashville, Tenn.

GENTLEMEN: I would most respectfully submit the following report of the operations, and the cost of maintenance of the prisoners at the Main Prison covering the biennial period ending December 19, 1912; giving in full the result of the operations of every department, which can be verified by the records on file in this office.

Respectfully yours,

G. F. CLARK, *Chief Clerk.*

NASHVILLE DIVISION, TENNESSEE STATE PRISON.

Balance Sheet, December 19th, 1911.

REPORT OF WARDEN

At Main Prison for Biennial Period, December 1,
1910, to December 1, 1912.

To The Honorable Board of Prison Commissioners, James S. Beasley, James May and E. W. Essary.

GENTLEMEN: In compliance with the law governing the office of the Warden of the Tennessee State (Main) Prison, I beg to herewith submit this general report of affairs under the official care of the Warden for the Biennial period ending at the close of business of November 30th, 1912.

I assumed the responsible position as Warden of this prison on the second day of November, 1911, with a determination to make better men and women of the unfortunates placed in my official charge. I knew that there was not a single woman or man in the prison who had become so hardened at heart, or traveled the road to degradation to such a depth, that kindness could not reach. I realized that they were all human beings, having been supplied with souls by the same God that made life possible for me. I felt that down deep in each heart there was left a spark, and that it were possible for even the Warden of a penal institution to reach that spark.

I began my administration by substituting kindness instead of the brutal treatment which the inmates had for years been subjected to, and during my year of incumbency, I find that my method of handling prisoners produces better results, from the fact that during the past year I have appealed to the spark of human instinct left in each inmate, and the result is that for the same period I have been able to reduce corporal punishment to about one-third of that of any year on record. We have a greater number of prisoners in the upper grade than at any previous date, and I feel that the adoption of the uniform for the upper

grade prisoners in place of the demoralizing and much hated stripes has done a great deal in causing the prisoners to obey the prison rules in order that they might discard the stripes.

I shall go on record as saying that I have as good, and I believe better discipline than any other prison in the whole country. I have taught each inmate that I was his or her friend, not by the use of the lash, but by kindness, and as a result each prisoner accords me due respect in my official position.

I wish to call special attention to the fact that just prior to, and since my incumbency as Warden, and under the supervision of our capable instructor and Chaplain, B. C. Regen, the prisoners without exception have been enjoying the liberties which the law prescribes, and which were denied them under all former administrations; that is, the liberty of improving themselves during their incarceration, by acquiring for themselves (at least) the fundamental principles upon which an education is based, through our night schools. It is a pitiful and significant fact, and to the discredit of the State of Tennessee, that at least fifty per cent of the prisoners received at this institution are unable to distinguish one from the other the letters of the alphabet. These figures will not, however, apply to our discharged prisoners, for they are taught to read and write, and before many weeks of their incarceration will have passed, these same ignorant and uneducated women and men, and boys are writing home to their loved ones telling them that their incarceration in the penitentiary has been made worth the while, and from a close observation along this line I can truthfully say that, about ninety per cent of our discharged prisoners are liberated with the light of an education illuminating their human brains.

The next question arising in my mind at this point is what becomes of our discharged prisoners. They complete the sentences as imposed, and are discharged according to law, and generally speaking are discharged with but a small amount of money. The business and industrial world close their doors to them. Society shuns them. Their hope of leading an honorable life is gone; they drift back into the temptations of former days, and in a short time are no more branded as an ex-convict,

but instead are being enrolled at this institution for the second, and probably the third time, as is the record in one case incarcerated here today. There are many discharged prisoners who were the victims of ignorance, or circumstances, and who are not criminal at heart, and who would become useful citizens and make of themselves honorable women and men if given a helping hand, instead of the branded ex-convict. The business, the industrial and the social world are responsible. How long will they let such conditions go unobserved and unattended to?

I am firmly convinced that the passage by the next Legislature of the indeterminate sentence and Parole Law would be of great benefit to the institution. It would cause each inmate to strive hard to comply with the rules of the prison that he or she might, by maintaining a perfect record, which would mean that the individual was at the expiration of a certain time eligible to a parole, subject to the action of the governing authority, and earnestly urge that the next Legislature give the convicted criminals of the State of Tennessee the advantage of such a law. No one who has made a careful study of these questions can fail to endorse them, and no state or county that has adopted such laws cares to have them repealed, and too:

The indeterminate sentence and parole laws keeps alive the hope that would otherwise be dead in many who enter the gloomy walls of the prison. It will promote better discipline, and cause them to lead upright lives during their incarceration. If for no other reason they will do so for self-respect, and when released on parole he goes to a position that has been prepared for him, a position that keeps his mind occupied, a position that keeps him from re-entering a life of crime. I urge the passage of such a law, that it may reach those who are really sorry for their past lives, and who in all sincerity are anxious to reform, and protect society from its most dangerous foes. There are many incarcerated within the walls today who are criminals by nature, and should never be released upon society, but the parole law would never reach that class of prisoners, from the fact that they are ever rebellious, and will not without force observe the remotest of the prison rules.

I also urge that the coming Legislature pass a bill authorizing the Board of Prison Commissioners to erect a hospital as a suitable place on the prison farm for the treatment of the tuberculosis patients confined within its walls.

A recent Legislature passed a bill making it incumbent upon the Warden, or the Deputy-Warden to execute all of Tennessee's convicted felons who are to suffer the penalty of death. I feel the passage of this law placed a great hardship upon the Warden and his deputy, and urge that this law be repealed by the next General Assembly, and in its stead pass a bill making it a law to electrocute the State convicted felons in the place of hanging them, which will be a more humane way of executing the State's convicted felons, and at the same time making it the duty of the Sheriff of the County in which the criminal was convicted to bring the prisoner to the Death House and there perform the duty of executioner.

The above recommendations I have made believing, that such measures are in accordance with an advancing civilization, and trust that they may be given due consideration by the Legislature, which meets early in the year 1913.

In conclusion I wish to thank your Honorable Board and all the officials connected with the prison for the many courtesies received at their hands, and the hearty co-operation given in handling successfully this vast body of men and women.

Respectfully submitted,

G. W. RIMMER, *Warden.*

NASHVILLE, TENN., DECEMBER 31st, 1912.

Honorable Board of Prison Commissioners, City.

GENTLEMEN: I have the honor to submit herewith for your consideration my biennial report, the most of which is a tabulation of complications of figures and facts made by Dr. W. G. Black, whom I succeeded.

On entering this work, I found Dr. W. G. Black in charge, whom I regard as a most worthy gentleman. I took up the work, and have gone through every department, studied them in detail, and have recommended such changes in said departments as would conduce to the betterment of the health of the men in the shops, and on second inspection I find that all departments have put into effect the suggestions which I have made, and have greatly reduced the dust in the shop, which is the greatest source of infection.

I note with great pleasure the small amount of sickness in this institution. Tuberculosis is the only malady to be seriously considered, I believe at least 25 per cent of all the inmates have tuberculosis in some form, many of whom are in the stage of incipency, and could be cured, at least a great per cent of them if it were possible to give them proper hygienic treatment.

I consider this is a condition that should be properly dealt with, as with the great per cent of inmates now afflicted it is only a question of time when this institution will be rendered entirely unprofitable by this malady, unless urgent steps are taken to segregate the infected from the well prisoners. At present we have every bed full in the tuberculosis ward at the hospital, and there is at this time more than twenty prisoners needing hospital treatment. Five men have died in the hospital within the last two weeks, and it now looks like we will have as many more deaths within the next few days. We only have vacant beds caused by deaths in the hospital, and unless some patients are pardoned that are now in the hospital, I expect a

number of deaths to occur in the Main Prison Wings in the next few days. This would be most unfortunate. I cannot too strongly urge that a separate prison and hospital be built for those unfortunates. These men were not convicted by the courts of offenses considered of such grade as to be punished by death, but if the prison continues to house and accommodate prisoners suffering the white plague, sentence to this prison means in substance a death sentence, not to be executed at once, but to die by slow degrees.

The hospital building is an old building with plaster falling off in all the wards. I have recommended hardwood floors for all the wards and the officers, as the old floors are full of and harbor the various germs.

I would recommend that a kitchen be established at the hospital where all the patients may have proper food prepared and served to them instead of being fed from the guards dining room, where inexperienced cooks are employed, and none of the delicacies that sick people need can be had. After the rooms are prepared for cooking and etc., very little expense should be had than now experienced.

I would recommend that an insane ward be built to confine those who by misfortune loose their minds.

The Warden, Mr. G. W. Rimmer, is a high-toned gentleman, and is giving his entire time and attention to the prison and its needs in every way.

The Chairman of the Prison Board, Colonel James S. Beasley, who is directly in charge of the Main Prison is a big-hearted man, and while he is looking mainly to the financial interest of the State, he does not lose sight of the little things that go to make up the happiness of the inmates of the prison.

The female department of the prison in charge of Mrs. Bettie Rozell, and is in a splendid sanitary condition. Mrs. Rozell is devoted to the work, and unprecedented success has been noted in this department of the prison.

Respectfully,

Z. D. MASSEY, *Prison Physician.*

New Uniforms Worn by First-grade Prisoners.

To the Governor of Tennessee and the Honorable Board of Prison Commissioners.

GENTLEMEN: I have the honor to herewith submit to you my first partial biennial report, beginning January 14, 1912.

The work has by no means been satisfactory to myself; however, we have been able to accomplish a few things.

Regular services are held each Sabbath at the Woman's Building, and main chapel. The attendance at the Woman's Building has been excellent, and the interest good. The matron, Mrs. Rozell, has been a vital force in these services, and the women prisoners have rendered valuable assistance.

The night school for women, conducted by the matron, is a decided success.

The services in the main chapel have been well attended, and a fine spirit manifested among the prisoners.

The Sunday school for men, under the efficient management of Superintendent G. C. Appleby and his corps of faithful teachers, is doing a great work, under the present conditions. An average of about five services each Sabbath have been held at the Main Prison, all well attended.

An important feature of the chaplain's work, is to, as nearly as possible, meet all newcomers on entering the prison and assuring them of friendship and readiness to help them in every way that would be for their good; also, giving an invitation to chapel services, as well as the night school, if they are not educated; and a large per cent have no education.

I would like to say that Warden Rimmer is "the right man in the right place," and I am greatly indebted to him and the other officials who have stood by me in my work.

Our night school is a wonderful success. About four hundred and fifty men and boys have passed through the school, a number of them have gone out, we have every reason to believe, to make good citizens.

Many of these men entered school not knowing a letter of the alphabet, who now, can read and write. Ninety per cent

of our school boys are in the first prison grade, showing plainly that the school is having a good moral effect upon the boys in attendance.

With this large number it would have been impossible to have accomplished so much good, had it not been for the willingness of the educated men to help the more unfortunate. We have a number of splendid teachers in the institution. These men have done a great work in a moral and literary way.

Work of the Chaplain is not confined to the prison alone. Visiting the families of the men incarcerated, and securing work for men on release is another feature of vital importance. It is very gratifying to report that every man for whom a position has been secured has made good, and not one who has expressed himself as wanting a position has been disappointed.

We are indebted to J. Pierpont Morgan for an excellent contribution to our prison library of twelve hundred and ninety-eight volumes. Other books and periodicals donated are: books, eight hundred and fifteen, periodicals and magazines, eighteen thousand and five hundred.

The evidence of the appreciation of these books, is the good use the boys are making of them constantly.

I have visited the hospital regularly and rendered what assistance I could. Those who have died and been buried were buried decently, with religious services.

Finding that the law provides that each prisoner shall have in his cell a Bible for his individual use, an order was given for five hundred copies, enough to supply the need.

Realizing that the object of imprisonment is not retaliation for wrong-doing, but reformation for the wrong-doer, I would recommend some improvements that would make our penal institute better equipped for greater moral and mental development.

In view of the fact that sixty-five per cent of the inmates have very little, or no education, I would recommend that the chapel of the Main Prison be enlarged at an expenditure of two thousand (\$2,000) dollars (this amount can be reduced by using

prison labor and material) and at the same time provide a library accessible to both white and colored wings.

The chapel at present is inadequate for chapel service, Sunday and night school. A large number who are anxious to attend night school have to be turned away for lack of room. The enlargement under plan mentioned would lessen or practically eliminate all hazard of attending chapel exercises by direct entrance from each wing to the chapel; therefore, I heartily recommend this improvement.

I heartily endorse the indeterminate sentence and the parole law.

Thanking the Board of Prison Commissioners for its co-operation in my efforts as chaplain of the State Prison, I am,

Most respectfully yours,

R. G. REGEN, *Chaplain, Main Prison.*

Brushy Mountain Coal Mines

Biennial Report Term Ending

November 30, 1912

Ninth Biennial Report of the Brushy Mountain Coal Mines, as submitted to the Honorable Board of Prison Commissioners, Hon. J. S. Beasley, E. W. Essary, and James May.

To the Honorable Board of Prison Commissioners, J. S. Beasley, E. W. Essary and James May, Nashville, Tenn.

GENTLEMEN: We are herewith submitting our biennial report, for the two years, beginning December 1st, 1910, and ending November 30th, 1912, which, together with the appended official reports and tabulative statements, show fully the operation of the mine and conduct of the prison during this biennial period.

The present management took charge here on the 20th of July, 1911. The plant was found in a very badly dilapidate condition. We went, at once, to the task of making the needed improvements, so as to increase the efficiency of the mines. To show the progress made, and something of the work which had been done, to November the 30th, 1911, we respectfully call attention to the exhaustive report of Superintendent A. W. Evans, submitted for the fiscal year, 1911, which in part, is as follows:

"In this report, I will endeavor to present a clear and concise statement of the progress of the operating department, setting forth in as terse terms as consistent with a clear understanding, the repairs that have been made to the plant and equipment and all construction work."

"During the year, the mine was in operation 305 days and the production was 283,322 tons. The market conditions were not good in the spring and summer, hundreds of tons of coal shipped to large dealers in Georgia and Tennessee, were on demurrage, and the dealers were requesting the management of the mines to withhold shipments. In consequence of which, we were forced to shut down the mine operations three days during the year. The miners were placed to work on the road and a general cleaning up of all entries. A second suspension of work occurred from September the 28th to October the 7th, inclusive, occasioned by the miners going on a strike, which was beyond our control."

MINE NO. 1.

"This mine which has been in operation since the inception of the enterprise, and has been a large producer, was abandoned October the 1st. All workable areas were exhausted and "Robbing Work" has been in progress for the last five years. In the salvage of the mines, the steel rails, mine cars, haulage locomotives, trolley wire and support, stationary motors, ventilating fan, coal tippie and freight incline hoist with motor, were saved, and will be used in the development of No. 3 mine."

"As our water supply for coke ovens, during the dry season, is furnished by this mine, the main entry was left open to protect the ditch through which this water runs to the surface. All other portions of the mine were mined out closely. There is quite a tonnage of coal still left in the outcrop coal between No. 13 and the portal of No. 10 right, this can only be mined with free labor, and hauled by wagons to the railroad.

MINE NO. 3.

"This mine, at present, is our only source of supply. This mine was opened in 1902, and it has been in constant operation. The development covers an area of 691 acres and contains twelve miles of track. The coal dips to the northeast, and as our main entries are driven on a course of N 33 1-4 degrees east, it will be seen that we are mining with the dip of the seam, and in consequence of which, we have to haul coal against gravity; also pump water up hill. These adverse grades on our haulage roads are potential factors in the cost of production, and as our development work advances, from year to year, our haulage grows longer in proportion, and the cost of production is increased proportionately. The geological conditions of the Brushy Mountain coal field are such that mining operations north of Crooked Fork Creek must be made on the dip of the measures. At a point 7,500 feet from the portal of No. 3 mine, a slope, with an inclination of 35 degrees, was made on main No. 2 entry, giving access to the New River Side of the Mountain. This slope was shaped to proper size, suitably timbered,

track layed and hoisting engine and motor installed and motor house erected during the summer. It has proven of great value to the mine, as all mine timbers are taken here and it is used as an intake for air, in the ventilation of the mine, as approximately, 45,000 cubic feet of air per minute enters at this point. The slope is used for pipes in the drainage of this portion of the mine. For the expedition of the timber work, a tram road 2,000 feet long, was graded on the New River Side, and laid with 20-pound steel and equipped with a good car, which runs by gravity to the slope. A mule is used to haul the empty car back. This scheme alone cut off wagons and mules, which had been used prior to this date, in hauling mine timbers. All of the timbers have been cut on the south side of the mountain, and we were forced to haul from the New River Side of the mountain. Development work has been resumed in the two main entries and a new district created. The main entry was "brushed" to proper width and height and 40-pound steel laid for a distance of 1,700 feet from No. 12 cross entry. Trolley wire installed from this point to foot of this slope, and also to face of No. 1 mine. A timber yard was made at the foot of the slope for storing mine timbers, and a Triplex Pump, 5x8, placed at foot of slope for pumping water out of the slope. Two cross entries have been turned to the left of No. 1 mine near its face, to connect with No. 1 left entry of No. 4 district. These entries will furnish the most direct route for the air and timbers from the slope to No. 4 District. The slope has a length of 135 feet. The superincumbent strata, at this point, is 55 feet."

HAULAGE.

"It is an established fact, that the operation of any mine, is dependent upon a variety of uncertain conditions, such as break downs in machinery, scarcity of railroad cars, accidents to machine equipment, floods, etc., rendering it impossible to anticipate a temporary suspension of work in advance of its actual occurrence. Our haulage equipment is antiquated to a great extent, and inadequate for the service. We are using five old type Good-

man motors (they have outlined their usefulness) and two new G. E. locomotives." On account of our antiquated motors and haulage system, the expenses in repairs are considerably more than they would be otherwise. We have, at this time, fifty-six mules, the most of which are used for mine purposes. The expense of feeding has increased 35 per cent in the last eight years. Statistics show that a mine mule consumes 10.61 pounds of hay and 9.37 pounds of corn and oats. This high price for feed entails further and greater expense in the production of coal.

CONSTRUCTION WORK.

(1) A new re-inforced concrete reservoir was constructed during the year, with a capacity of 600,000 gallons. 1,600 yards of dirt was excavated for the site. Great pains were taken in order to get a good foundation. The dam is 18 feet high, 60 feet wide; side wall 18 feet high and 135 feet long. The reinforcement consisted of old worn out 60-pound rails. The proportion of the mixture was 1-3-6. Care was exercised in accurately proportioning the material. The material used in the construction is as follows:

| | | |
|--|----|----------|
| 14,845 Feet of timber in forms at \$10.00 | \$ | 148 45 |
| 2,394 Bags of cement at 34 cents | | 813 96 |
| 12 Tons of re-inforcement at \$10.00 | | 120 00 |
| 3,060 Pounds 2½ round iron at 3 cents | | 56 00 |
| 17 Pieces 8 ft. pipe, 1 piece 8 ft. tee, 1 piece 8 ft. plug, at \$26.00 ton | | 118 79 |
| Labor | | 2,653 46 |
| 20 Rods fence | | 10 08 |
| 4 Cars of sand | | 210 00 |
| | \$ | 4,130 74 |

(2) A new retention bin for slack coal was constructed during the year; 10,853 feet of timber was used.

(3) A new coal chute at the head of No. 3 incline was built during the year. This chute is 10 feet wide and 65 feet long. A roof was placed on new chute. 10,700 feet of timber was used in the construction. The chute was lined with No. 16 steel.

(4) A new incline drum was installed at No. 3 incline during the year, at a cost of \$545.22. A reinforced retainer wall behind the drum, at No. 3 mine was constructed during the year, at a cost of \$377.48; 50 per cent of this amount, however, goes to labor in the excavation for the retaining wall.

(5) The incline from No. 3 mine was completely overhauled, changing what was a constant source of annoyance and trouble to a smooth and swift gliding incline.

(6) Three culverts on the railroad were rebuilt and a storage tract under the tipple extended 150 feet to facilitate the loading of washed coal.

(7) Two new monitor cars for the incline were built.

(8) New bottom stringers were placed in 1,000 ton settling bin.

(9) The electric repair shop moved from near the machine shop to No. 3 mine yard.

(10) Trestle at the foot of No. 3 freight incline was filled in during the year.

(11) Dwellings have been repaired and put in good condition.

(12) The Wilson and Mitchell cross over dump was moved from No. 1 mine and installed at No. 3 mine.

COKE PLANT.

The coke plant comprises two parallel batteries of 40 and 100—12x7 ft. Bee Hive Ovens. These ovens are upon an incline of 1 1-2 per cent grade and Larry cars, with the capacity 6 tons, are used in filling the ovens, after they are run down by gravity, with slack coal. The cars are returned to the coal bin by rope haulage.

The ovens and the entire washing plant have been overhauled, the cost of overhauling the ovens being about \$6.00 per oven. The coal here is exceedingly high with sulphur, and is so chemically mixed with the coal, that the whole of the sulphur cannot be eradicated. We have, however, by improvements in the washer, been able to reduce the sulphur and make a coke admirably adapted for furnace purposes.

The washer which is used is a 500-ton Robinson washer, directly connected to Pulsometers by 6" and 8" cast pipe for water circulation. The plant is an old style washer, but by needed repairs being made, it has done satisfactory work.

During the last year of this biennial period, the improvement in plant and equipment, has been continued. Among other things done, are the following:

- (1) Built a substantial rock crusher and sand house to be used in supplying the motors with sand.
- (2) Purchased a 6-ton General Electric Motor, at a cost of \$1,800.00.
- (3) Bonded main entry haulage road, with compressed terminal bonds to conserve electric energy.
- (4) Installed a compressed air machine.
- (5) Driven second entry to mine No. 3, at a distance of 2,000 feet, constructed and bonded track, erected trolley wires, to facilitate haulage from said mine. Prior to driving this entry the mine had but one haulage way, and all loaded cars from the mines, and empties returning, had to be used over the same track.
- (6) No. 3 yards have undergone a complete change. Old wooden trolley supports have been replaced by three-inch wrought iron pipes, erected in concrete pillars; new tipples and scale house built, thereby permitting the loaded cars to come out of one haulage way and be unloaded and returned the other.

The market conditions, during the whole of the first year, were everything but satisfactory, and they have not been encouraging since, until within the past few weeks. There has been a bold tendency in the market recently and the outlook at present, appears flattering; it may be only temporary, but we trust permanent.

Attached hereto and made a part of this report, are statistics compiled by the bookkeeper, showing receipts, and disbursements and the net results of operation during the biennial period.

Special attention is called to the following:

Net cash remitted to the Treasurer shows an increase of \$18,648.30 for this biennial period over that of 1910-11. The second year of period embraced in this report shows an increase over the first of \$91,502.88, showing that the interests of the state are being conserved with an increasing efficiency. This is due, as well to close attention, to collections, as to strict economy. There has arisen during this biennial period, no losses from bad accounts, worthy of mention, and even these still show hopes of ultimate liquidation.

There are on the books, some considerable sums, in the way of notes, stocks and bonds, which the present administration has acquired by inheritance, which should be removed from our records, without prejudice to our showing as to net results.

As to economy as practiced, by the present management, in order that comparisons may be fair, we are including a tabulated statement, showing an increase in cost of commodities, for the last thirteen years. The increase has been gradual, but rapid and steady, until it has nearly doubled in many of the necessities.

| Comparative cost of Commodities as of July 31st | 1899 | 1900 | 1901 | 1902 | 1912 |
|---|---------|---------|---------|----------|----------|
| Meat (D.S. ribs)..... | \$ 0535 | \$ 0710 | \$ 0859 | \$ 98875 | \$ 10825 |
| Meal (per cwt)..... | 1 00 | 1 05 | 1 28 | 1 59 | 2 00 |
| Flour (per bbl)..... | 3 00 | 2 50 | 2 60 | 2 85 | 4 30 |
| Suits..... | 1 75 | 1 75 | 1 50 | 1 50 | 2 25 |
| Shoes..... | 1 10 | 1 10 | 1 10 | 1 10 | 1 75 |
| Guards (per mo.)..... | 40 00 | 40 00 | 40 00 | 40 00 | 60 00 |
| Beef..... | 0475 | 0475 | 0475 | 06125 | 0655 |
| Iron (Basis)..... | 2 40 | 1 60 | 2 20 | 2 15 | 2 20 |
| Oil (Sunshine)..... | 06 | 06 | 05 | 0475 | 0450 |

| Mules..... | 65 00 | 65 00 | 70 00 | 80 00 | 150 00 |
| Warden..... | 100 00 | 100 00 | 100 00 | 100 00 | 150 00 |
| Doctor..... | 100 00 | 100 00 | 100 00 | 100 00 | 150 00 |
| Chaplain..... | 20 88 | 20 88 | 20 88 | 20 88 | 62 50 |

The selling price of coal has been kept up and the output placed on the market in spite of the well-known depression in the coal market, during the past summer and fall, through the wisdom of contracting with large and responsible parties, thus evading the loss of many thousand dollars and the enforced idleness (except for three days, as stated above), incident to stagnant market conditions.

In view of the increased cost of haulage and dead work, will say that the average haul is over a mile farther than two years ago, and the correspondingly increased area will make larger from year to year (until the exhaustion of the present vein), the cost in the above account and also the cost of cutting coal, as the men have that much farther to go to and from their work. There is charged to dead work about \$2,000.00 covering the cost of the parallel entry heretofore mentioned, to facilitate haulage, and which will be of great benefit to the operation of this mine until exhausted. The work done on No. 3 yard is also carried in the expense column; although the benefits spread over the years to come, will make this work a valuable asset to the state of which this administration will get only a partial benefit.

There are several thousand acres of timbered land, owned by the state, in the Brushy Mountain territory. Much of this timber is valuable and should be pruned and marketed. The Board of Prison Commissioners have no authority, under the present law, to dispose of the timber, except for mine purposes. On the account of the lack of this authority, the state has sustained a great loss in the natural decay of the timber and through damage done by forest fires; besides, much of it, from time to time, as I have been informed, has been stolen.

Besides our present railroad facilities another railroad is being built toward this property, and when completed, will be within easy access to same, which will give additional and ample facilities for getting the timber to market, therefore, I would earnestly recommend that the Legislature, at its next session, pass a law, giving the Board of Prison Commissioners, the authority to have this timber properly pruned and disposed of, especially that part which is naturally going to waste. This

should be done under such restrictions and so well safeguarded as to fully protect the interests of the state.

The prison conditions, we believe, were never better. The men appear to be as well contented as it is possible for them to be, in a condition of servitude. The discipline is excellent. Kind treatment, establishment of a school, adopting the merit system, allowing the use of uniforms to the best grade of prisoners and trusting numbers of them on their honor, all has had a tendency to better the conditions and improve the discipline.

We need a number of new laws pertaining to prison reform, which if enacted, would still improve conditions. These measures, which are advocated by the present administration, are too well known to enumerate herein. I suggest that they be recommended by the joint board and their passage urged.

Respectfully submitted,

E. W. ESSARY, *Manager of Mines.*

Brushy Mountain Prison, Petros, Tenn.

WARDEN'S BIENNIAL REPORT

*To the Honorable Board of Prison Commissioners, J. S. Beasley,
E. W. Essary and James May, Nashville, Tennessee.*

GENTLEMEN: I have the honor to herewith submit the Ninth Biennial Report for the term beginning December 1st, 1910, and ending November 30th, 1912.

Since my appointment as Warden, 22nd of March, 1912, I have devoted my entire time to the betterment of conditions here. It has been my aim to get the services of the prisoners by the kindest treatment possible. I found a spirit of discontent and dissatisfaction among them, and during the first two months of my administration as Warden, I had several escapes, but you will notice by referring to my report that I lack only one having the same number recaptured as escaped. This within itself has a tendency to keep up the discipline of the prison and now our men are doing the work cheerfully. And among our whole number, of over seven hundred, there are but a few who have to be punished about their work. This change has been brought about by kind treatment of the employes and by personal advice from the officials, and by the help of the better class of prisoners.

I have personally seen that our men are comfortably clad, through summer and winter, that our food at all times has been wholesome and well prepared and our sleeping quarters in good sanitary condition; that the beds have been made comfortable and the clothing at all times kept clean.

We are in need of repairs about the prison and stockage, but owing to the fact that there has been so much repairing done in the Operating Department, which was absolutely necessary, we have been unable to get this work done.

I am glad to report that a large per cent of the convicts are

trying to make good men, so that when they are given their freedom, instead of going back to crime, they will make good, law-abiding citizens. I believe a good per cent of the prisoners here would make good citizens if they had the chance.

On account of the nature of our work, we are compelled to put a great number out, both day and night on their honor, and they have shown their appreciation of this trust by their good conduct. I think we should have a parole law whereby a convict who shows by his actions and conduct that he has reformed may secure his release. The parole system has had its inception and is growing in favor in other states, and I believe such a law would be beneficial to the State of Tennessee. Under the parole system, the poor unfortunate man, who has been convicted and sent to the penitentiary, without friends at home to intercede in his behalf, may secure his release as easily as the more fortunate prisoner who has money and friends.

People are beginning to look upon the penitentiary not as an institution totally punitive, but as a place of reformation for the less hardened transgressors of the law. Our system of grading prisoners has proven a success. We have used the uniform, adopted by the Board, so far as the nature of our work would permit, and results obtained have been amazing. We have separated the younger prisoners from the older and more hardened ones as much as possible. Under this system we have reduced the corporal punishment for the last few months below the record of any previous years, and at the same time, increased the results of labor.

The question that confronts the people today is "What is to become of the prisoner's family upon his incarceration in the penitentiary, and what will become of the prisoner when he has served his time?" I believe that we should have such legislation that will provide a certain per cent of the prisoner's net earnings for the maintenance of his family and upon his release that enough of money be given him to maintain himself until he can secure employment.

I wish to thank the Board of Prison Commissioners for their cordial support given through their representative, Mr. E. W. Essary, since the assumption of my duties at this institution.

Very respectfully,

J. E. BURROW, *Warden.*

Branch Prison, Petros, Tenn.

**Physician's Biennial Report Year
Ending November 30, 1912**

Physician's Report of The Brushy Mountain Prison Hospital, Ending November 30, 1912.

To the Board of Prison Commissioners, Nashville, Tennessee.

GENTLEMEN: The following Biennial Report of the Brushy Mountain Prison Hospital, for the term ending November 30th, 1912, is respectfully submitted.

During the first ten months of this period, the hospital was under the supervision of my predecessor. I was appointed to the position in September, 1911. Since that time some necessary fixtures and furniture have been supplied, and we now have an up-to-date hospital, where the sick are cared for with as much interest as though they were in a private institution. They are supplied with all the accommodations necessary for their comfort, that tend to make restoration to health possible, except in cases of tuberculosis referred to farther on. Special effort has been made to keep the prison free from epidemics by giving considerable attention to sanitary conditions.

During my term of service as physician, there has been only one case of typhoid fever. This patient was transferred from the Main Prison during the incubation period. Previous records show various epidemics of typhoid fever and other contagious diseases, but the reservoir constructed during the present administration supplies the prison with pure water, and by proper attention, an epidemic of such a disease as typhoid fever is rendered almost entirely impossible, and of others more contagious, the probability is greatly reduced.

During my term the mortality among the prisoners has been reduced 46 per cent; the number of cases treated at the dispensary, for minor ailments, accidents and chronic diseases, who are excused from daily labor, has been decreased 38 per cent.

During my work here I have had the hearty co-operation of

the Warden and other State officials, who have duties in connection with the prison, and have experienced no trouble in securing proper clothing and diet for the prisoners. I have endeavored to look carefully after the general health and sanitary condition of the prison, and to provide employment for the afflicted, who are not able to work in the mines, such as would not be injurious to their health, but at the same time engage their minds and also bring some income to the State for their maintenance.

The present accommodations, however, are not sufficient for the proper isolation and care of the tuberculosis patients. This is the one disease now to be dreaded and with which we have to contend. Since I have been here nearly half of the deaths have resulted from tuberculosis, and more than 50 per cent of those excused daily from work are in some way affected with this disease. Under proper conditions, which could be provided, by having a separate hospital for their isolation and treatment, many of the prisoners affected with this disease, in its early stages, could be cured, the lives of others prolonged, and the possibility of infecting the well would be entirely removed, but under the present conditions many of them soon became a burden to the State and they are constant menace to the health and lives of those with whom they come in daily contact. The greatest possible care and effort are not sufficient to keep the prison free from tubercular infection. Governor Hooper properly expressed the condition when he said: "The prison in this state is a hot bed for tuberculosis." Many of these patients are suffering with incipient tuberculosis when sent to prison here. There is no doubt in my mind but that many of them contract this disease while in jail, in the various counties, awaiting trial. I have had occasion to visit a number of county jails during the past twelve months, and find that many of them are in an unsanitary condition.

It would greatly reduce the number of tubercular subjects in this prison if the county jails were under the control of the State Board of Health and properly inspected by the State Board officials and the jail officials required to keep them in proper

sanitary condition. This would be a great cause toward eliminating this disease. The next Legislature should properly consider this matter and appropriate sufficient funds to build a hospital at some suitable place where the tubercular prisoners may be isolated and cared for according to the requirements necessary for the proper treatment of the diseases. If these two things were done, that is, if the jails were kept in proper condition and a suitable hospital provided for, the isolation and treatment of tubercular patients in the State Prison, the State of Tennessee would soon take high rank among the agencies in the United States for the extermination of the great "White Plague."

In conclusion, I wish to thank you for the interest you have taken in my department and the prison work. I am sure our record here during this administration will be a credit to many of us.

Respectfully submitted,

G. G. KEENER, *Prison Physician.*
